

**AFFINITY HIS-TAG PURIFICATION  
 TECHNICAL SPECIFICATIONS  
 CHELATING Agarose BULK resins**

<b>BEAD (Geometry, size)</b>	Spherical, Standard: ~ 50-150 µm							
<b>CROSS-LINKED</b>	Yes							
<b>AUTOCLAVABLE</b>	121 <sup>o</sup> , 30'							
<b>AGAROSE %</b>	6% agarose							
<b>ACTIVATING AGENT</b>	Epichlorohydrin							
<b>MATRIX</b>	Stable in all commonly used reagents <sup>(1)</sup>							
<b>PRODUCT NAME</b>	<b>HIGH Density</b>				<b>LOW Density</b>			
	METAL FREE	NICKEL	ZINC	<b>COBALT</b>	METAL FREE	NICKEL	ZINC	COPPER
<b>Catalog Number</b>	<a href="#">H-300</a>	<a href="#">H-320</a>	<a href="#">H-330</a>	<a href="#">H-310</a>	<a href="#">H-301</a>	<a href="#">H-321</a>	<a href="#">H-331</a>	<a href="#">H-311</a>
<b>BINDING/LOADING CAPACITY</b>	20 - 40 (µmol Me <sup>2+</sup> /ml gel)				5 - 20 (µmol Me <sup>2+</sup> /ml gel)			
<b>ANTIMICROBIAL AGENT</b>	20% Ethanol							
<b>STORAGE TEMPERATURE</b>	2 - 8°C							

<sup>(1)</sup>See Chemical Stability under in “Bulk Resin Chelating Agarose Beads Procedure”.

**For laboratory use only. Not for use in diagnostic or therapeutic procedures.**
